

Elgin Public Library

Technology Improvement program!

Attention Patrons!

The Elgin Library has recently upgraded our computers to new 24" All-in-ones! They're faster, silent, and have great screens, making searches and internet access easier and more fun for all.

Coming soon,

- We will have 2 new 3D Printers, a variety of filaments, and we'll be offering printing services in PLA*!
- We will **also** have a new Mac mini for our patrons who are more familiar with Mac OS.
- Finally, we will have two Raspberry Pi 400 computer kits available for check-out (with deposit) for those interested in learning programming, robotics, and Linux.

*PLA is an industrially biodegradable plastic that is non-toxic and easy to print for many uses. Come see the librarian and talk about what we might make for you!
